JeetuSuthar

Portfolio

Education

Sinhgad Institute of Technology and Science

August 2022 – May 2026

Bachelor of Engineering in Computer Engineering — CGPA: 9.13

Narhe, Pune

Experience

Software Development Engineer Intern

November 2024 – August 2025

Wynoot Labs, Crafteak

Remote

- Engineered a responsive **website builder** using **Next.js**, **TypeScript**, with drag-and-drop functionality, customizable templates, and real-time editing—empowering users to build and deploy professional-grade websites without coding.
- Built **AI-powered** features using **GenAI** for **automatic template generation**, allowing users to design and publish functional websites through natural prompts.
- Integrated real-time editing and live preview using React, with automatic syncing to **AWS S3**, improving content deployment efficiency by **30%**.

Full Stack Developer Intern (MERN)

February 2025 – April 2025

WaveNxt Technology Pvt. Ltd.

Remote

- Engineered a **real-time WiFi performance analysis tool** using **Plotly.js** and **WebSockets**, enabling live data visualization across **10+ clients** and improving network testing efficiency by **25%**.
- Built **backend automation** for 6 critical WiFi simulation workflows using **Node.js** and **MongoDB**, reducing execution time by **30%** and improving process accuracy.
- Developed and Added React-based components to **visualize** and **simulate WiFi parameters**, enhancing performance measurement accuracy by **30%** across varying network conditions.

Projects

CollabDraw : Real-Time Collaborative Canvas | *Next.js, TypeScript, WebSockets, TurboRepo, Prisma*

Link

- Crafted a real-time collaborative sketching tool using **WebSockets** and **JWT** for secure **room-based collaboration**. Tested with 5 simultaneous users, enabling smooth **multi-user interaction** on a shared canvas.
- Optimized development workflow by **Dockerizing** the application, enabling **CI/CD**, and deploying on scalable VM, leveraged **TurboRepo** for modular code structure, achieving **40%** faster builds and **60%** quicker deployments.
- Architected a fully **custom interactive canvas** from scratch without third-party libraries, optimizing input event handling, **AI** Integrated and rendering pipeline to reduce input latency by **25%** and enhance user responsiveness.

Spark.AI : AI-Powered Website Builder | *Next.js, JavaScript, Tailwind CSS, ConvexDB*

Link

- Developed an AI-powered website builder with **chat history**, **code preview**, and **AI-driven responses**, allowing users to **deploy websites** via hosted links and **download code folders**.
- Incorporated payment gateway and OAuth authentication for secure transactions, reducing deployment time by 25%.
- Leveraged Google Gemini for **real-time code generation** through natural language prompts, enhancing user engagement and automating frontend development workflows.

UptimeNow : 24/7 Website Monitoring System | *Next.js, Node.js, Redis Streams, PostgreSQL*

Demo

- Developed a 24/7 uptime monitoring system for websites and services, with **instant email alerts** for downtime events.
- Engineered **scalable** event processing with **Redis Streams** and worker consumers, **detecting outages** within **30s** and handling **10k+ checks/day** with **35% faster response times**.
- Implemented **status pages**, improving incident visibility and enabling **99.9% uptime reporting**.

Technical Skills

Languages	: JavaScript, TypeScript, C/C++, Java, HTML/CSS
Frameworks & Libraries	: Next.js, React.js, Express.js, Node.js, Tailwind CSS, Redux, WebSockets
Developer Tools	: Git, GitHub, Visual Studio Code, Postman, Monorepo, Turborepo
Databases & ORMs	: SQL (PostgreSQL), MongoDB, Redis, Prisma ORM, ConvexDB
DevOps & Cloud	: Docker, AWS, DigitalOcean, GitHub Actions, CI/CD Pipelines

Achievements & Open Source

- Merged **2 Pull Requests** to **Node.js**
- Merged **4+ PRs** to **BiomeJS**: a modern web toolchain (20k+ GitHub stars) for linting and formatting
- Contributed to **Hacktoberfest 2024** enhancing **3+ open-source** projects with React and Tailwind CSS.
- Achieved 2-Star Rating on CodeChef, secured **Global Rank 855** in Starters 135 (Division 4) contest.
- Solved **750+** problems on LeetCode and GeeksforGeeks, showcasing expertise in data structures and algorithms.
